## Product Overview

### Precision Refrigerant Management

This professional-grade electronic scale is engineered for high-precision refrigerant charging and recovery tasks. Designed with durable construction and intuitive digital controls, it ensures accurate measurements essential for HVAC maintenance. The compact and portable design makes it an ideal tool for field technicians requiring reliable performance in demanding environments.

## Technical Specifications

### Available Models

- VES-50A
- VES-100A
- VES-50B
- VES-100B

### Certifications

CE

## Key Features

### Core Capabilities

Quantitative Filling • Precision Control • Recovery Management • Portable Design
