

# Refrigerant Flush Gun Kit

This kit quickly and efficiently removes old refrigerant oil and debris. It is used before replacing or retrofitting a compressor system.

## Product Overview

### Professional Refrigerant Flush Gun Kit

This comprehensive flush gun kit is designed to effectively remove contaminants, moisture, and acid from refrigeration and air conditioning systems. It features a durable aluminum alloy and brass construction with a 900ml internal volume capacity. Equipped with a pressure gauge and versatile hose connections, this tool is essential for maintaining system performance and longevity.

## Technical Specifications

### Working Pressure

**90 psi**

Min Pressure

**150 psi**

Max Pressure

Materials	Aluminum alloy, Brass
Internal Volume	900 ML
Gauge Capacity	200 PSI

## Compatibility & Connections

### Compatible Refrigerants

R134a • R12 • R22 • R410a • R404a

### Connection Types

- 1/4 SAE
- 1/4 NPT

Hose Color	Yellow
