

# Refrigerant Recovery Unit for R32 and 1234yf

This recovery unit is suitable for R32 and 1234yf refrigerants. It is engineered for efficient and reliable refrigerant recovery in various air conditioning and refrigeration systems.

## ADDITIONAL IMAGES

## Overview

### Professional Refrigerant Recovery

This high-performance refrigerant recovery unit is engineered for efficient and reliable recovery across various air conditioning and refrigeration systems. Designed for HVAC/R technicians and industrial professionals, it features a robust compressor and durable construction to handle demanding environments. The unit ensures fast, thorough recovery while meeting industry safety standards, making it an essential tool for maximizing productivity and minimizing downtime.

## Technical Specifications

### Power Rating

**0.75 HP**

Motor Power

### Model

VRR-12U

### Voltage & Frequency

220-240V~, 50/60Hz

## Compatibility & Compliance

### Certifications

CE • Chinese Patent

### Supported Refrigerants

R32, 1234yf

## Safety & Usage

### Safety Guidelines

- Read instructions before use
- Wear eye protection and protective gloves
- Use approved recovery tanks only
- Do not overfill recovery tanks
- Do not mix different refrigerants
- Ensure work area is well ventilated
- Do not smoke during recovery
