

# Refrigerant Recovery Vacuum Pump for R32 and 1234yf

This vacuum pump is designed for recovering R32 and 1234yf refrigerants. It ensures efficient removal of air and moisture from refrigeration and air conditioning systems.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Refrigerant Recovery

This professional-grade vacuum pump is specifically engineered for use with R32 and 1234yf refrigerants, providing an essential solution for HVAC evacuation tasks. Designed with a robust oil-sealed rotary vane mechanism, it ensures reliable removal of moisture and air from refrigeration systems to maintain optimal performance. It is a trusted choice for technicians seeking precise, efficient, and durable equipment in the field.

## Certifications

### Certifications

CE • Chinese Patent

## Technical Specifications

### Key Performance Metrics

**15 Micron**

Ultimate Vacuum

**4 CFM**

Free Air Displacement

### Model Specifications

Model	Pump Speed	Motor	Oil Capacity
V-i240Y	2 CFM	1/4 HP	250 ml
V-i260Y	3 CFM	1/4 HP	250 ml
V-i280Y	3.5 CFM	1/4 HP	250 ml
V-i2120Y	5 CFM	1/2 HP	320 ml

## Power Requirements

Electrical Input	220V-230V / 50Hz
------------------	------------------

## Compatibility

Supported Refrigerants	R32, 1234yf
------------------------	-------------
