

Refrigerant Vacuum Pump for HVAC Systems

This single-stage vacuum pump is designed for use in refrigerant applications. It is suitable for R410a, R407c, R1234a, R12, and R22 refrigerants.

Product Overview

Professional HVAC Vacuum Pump

This single-stage vacuum pump is engineered for reliable performance in HVAC maintenance and repair. It is designed to handle a wide range of refrigerants, ensuring versatility for various industrial and commercial systems. With integrated features like a vacuum gauge and oil viewing window, it offers precise monitoring and durable operation for professional technicians.

Technical Specifications

Rated Air Displacement	3 CFM
Ultimate Vacuum	150 micron
Power Rating	0.25 HP
Oil Capacity	250 ml

Electrical Requirements

Voltage	110~220V
Frequency	50 Hz
Rated Current	2.8 A

Compatibility

Compatible Refrigerants	R410a, R407c, R1234a, R12, R22
