

Refrigerated Air Dryer for Industrial Use

This refrigerated air dryer removes moisture from compressed air. It features user-friendly controls and robust construction for reliable operation.

Overview

Industrial Refrigerated Air Dryer

This refrigerated air dryer is engineered for demanding industrial applications, providing efficient moisture removal from compressed air systems. Its robust construction and compact design ensure reliable operation, protecting your pneumatic tools and equipment from corrosion and damage. Ideal for diverse sectors including manufacturing, automotive, and electronics, this unit offers user-friendly controls for seamless integration into your existing workflow.

Technical Specifications

Model Identifier	ED-20F
Suitable Industries	Manufacturing, Automotive, Electronics

Key Features

Primary Benefits

- Efficient moisture removal
- Compact space-saving design
- User-friendly control interface
- Robust construction for durability
