

Refrigerated Cake Display Case

This refrigerated display case is designed for showcasing cakes and pastries. It features ultra-white heating glass and LED lighting for enhanced visibility and an optimal cooling temperature.

Product Overview

High-visibility refrigerated display with advanced forced-air cooling and energy-efficient LED lighting.

Professional Refrigerated Cake Display Case

This premium cake display case features ultra-white heating glass and high-brightness LED lighting to ensure an optimal visual presentation of your products. Engineered for performance, it reaches a steady 5°C temperature within 20 minutes of startup, even in high ambient temperatures of 30°C. With high-quality imported components like Embraco compressors and Dixell controllers, this unit maintains a clear, fog-free environment even while doors are open for service.

Key Features

Cooling Performance

5 °C

Target Temp

20 min

Cooling Speed

Compliance and Standards

CE Certified, RoHS Compliant
