

Refrigerated Delivery Truck for Perishable Goods

This refrigerated truck is designed for transporting temperature-sensitive goods. It features a refrigeration unit to maintain consistent temperature control during transit.

Overview

Reliable Cold Chain Logistics Solution

This refrigerated delivery truck is engineered specifically for the secure transportation of temperature-sensitive goods. Built upon a robust light-duty chassis, it offers the ideal balance of maneuverability and reliability for urban and regional distribution. The vehicle features a specialized insulated cargo box equipped with an advanced refrigeration unit, ensuring consistent climate control throughout the delivery process.

Technical Specifications

Chassis Configuration	Light-duty commercial chassis
Cargo Features	Insulated walls, Front-mounted refrigeration unit, Digital temperature control

Performance Metrics

Rated Capacity

53300 kg

Payload Capacity

Application

Recommended Usage

- Urban food delivery
- Regional cold chain logistics
- Perishable goods transport
