

Refrigeration and Air Conditioning Evaporator

This evaporator series is designed for efficient heat transfer in refrigeration and air conditioning systems. Featuring a compact and robust construction, it ensures reliable performance and longevity.

Product Overview

High-Efficiency Evaporator Series

This evaporator series is engineered for superior heat transfer efficiency in a wide range of refrigeration and air conditioning systems. Featuring a compact and robust design with optimized fin spacing and tube geometry, it maximizes the heat exchange surface area to deliver enhanced cooling capacity and energy efficiency. Built for durability and ease of maintenance, this unit is an ideal solution for both residential and commercial cooling applications.

Technical Specifications

Design Features

- Compact and robust construction
- Optimized fin spacing
- Optimized tube geometry
- Easy installation and maintenance

Quality Assurance

Stringent Quality Standards • Durable Construction

Suitable Applications

Refrigerators, Freezers, Air Conditioners

Refrigerant Compatibility

Compatible with a variety of standard refrigerants
