

Refrigeration Evaporator - Series WJ-E709

The WJ-E709 series evaporator facilitates efficient heat transfer in cooling systems. Its compact design enhances surface area for optimal heat absorption.

Overview

High-Efficiency Refrigeration Evaporator

The WJ-E709 series evaporator is engineered for superior heat transfer performance in refrigeration and air conditioning systems. Its compact, multi-channel design maximizes surface area to ensure optimal cooling efficiency and rapid heat absorption. Built with durable materials, this unit is designed for long-lasting reliability and seamless integration into various cooling applications including refrigerators and freezers.

Technical Specifications

Primary Applications

- Refrigerators
- Freezers
- Air Conditioning Systems
- General Cooling Devices

Series Model	WJ-E709
Design Features	Compact Design, Multi-channel, High Surface Area

Integration

Installation Notes

Electrical Connections Included • Easy System Integration
