

Refrigerator Component Molds

These transparent plastic molds are designed for manufacturing refrigerator components, including drawers and shelves. The molds are crafted to ensure accurate dimensions and smooth surfaces.

Product Overview

High-Precision Refrigerator Component Molds

This specialized set of molds is engineered for the high-volume production of refrigerator drawers and shelves. Each mold is crafted with precision to ensure consistent dimensions and superior surface finish for all produced components. Featuring structural ribs and integrated ventilation slots, these molds are designed to meet the rigorous durability and functional requirements of modern refrigeration hardware.

Technical Specifications

Available Models

- Refrigerator mould_411
- Refrigerator mould_410
- Refrigerator mould_409
- Refrigerator mould_408
- Refrigerator mould_407
- Refrigerator Drawer mould_40

Key Design Features

Slotted ventilation, Structural ribs, Precision engineering, High-volume production ready

Primary Application

Refrigerator drawers and shelves
