

Refrigerator Component Mould

Moulds designed for the production of refrigerator components. These include drawer moulds and various other part moulds, ensuring precise dimensions.

Product Overview

Precision Refrigerator Component Moulding

This range of high-precision moulds is engineered specifically for the manufacturing of refrigerator drawers and critical internal components. Designed to ensure consistent quality and exact dimensional accuracy, these tools support streamlined production cycles. They are essential assets for professional refrigerator assembly lines seeking reliable and durable plastic moulding solutions.

Technical Specifications

Available Mould Types

- Refrigerator Drawer Moulds
- Refrigerator Interior Part Moulds
