Product Overview

Compact Refrigeration Solution

The GQR30U series compressor is a high-efficiency unit specifically engineered for compact cooling applications such as water dispensers, mini drink cabinets, and beer coolers. Optimized for R290 refrigerant, this LBP compressor provides reliable performance with a nominal power of 1/12HP. Its robust design and versatile electrical compatibility make it an ideal choice for professional refrigeration equipment requiring consistent cooling capacity.

Technical Specifications

Model Number	GQR30U
Motor Type	RSIR
Cooling Method	ST
Application Class	LBP

Performance Metrics

Efficiency and Capacity

80 W Cooling Capacity	1.3 COP	0.083 HP Nominal Power
---------------------------------	-------------------	----------------------------------

Electrical Requirements

Voltage Range	220V - 240V
Frequency	50/60Hz
Starting Device	PTC, CURRENT Relay

Environmental Compliance

Refrigerant

R290
