Product Overview

High-Efficiency Refrigeration Solution

This LBP (Low Back Pressure) series compressor is engineered for optimal performance in refrigeration appliances such as refrigerators, freezers, showcases, and wine coolers. Utilizing R600a refrigerant, it delivers high energy efficiency with reliable operation and minimal noise output. The unit is designed to handle light vibration, ensuring a stable and long-lasting cooling solution for diverse commercial and residential applications.

Technical Specifications

Refrigerant	R600a
Voltage	220-240V
Frequency	50/60Hz
Application	LBP, Refrigerator, Freezer, Showcase, Wine Cooler

Performance Features

Key Features

- High efficiency energy consumption
- High reliability
- Low noise operation
- Light vibration design
