

Refrigerator Defrost Timer Control Unit

This component is a specialized defrost timer or control unit for refrigerators. The DG-XWDB04 features a durable black housing with multiple electrical contacts and a plug-and-play connector.

Product Overview

Reliable Defrost Control

The DG-XWDB04 is a specialized control unit engineered for refrigerator defrost systems. Featuring a robust circular housing and integrated electrical contacts, this component ensures precise timing for efficient defrost cycles. Its plug-and-play design simplifies installation, making it an ideal replacement part for maintaining optimal appliance performance.

Technical Details

Model Number	DG-XWDB04
Component Type	Defrost Timer Control Unit
Primary Application	Refrigerator, Defrost System

Design & Build

Build Features

Robust Build • Plug-and-Play

Housing Shape	Circular
Connection Type	Wired with connector
