

Refrigerator Door Position Switch

This refrigerator door switch is designed for use in refrigeration equipment. It features a durable construction with electrical wires for connection and is mounted on a metal bracket for secure installation.

Product Overview

Versatile Door Sensing Solution

This door position switch provides reliable, automated control for household electrical appliances. It is primarily engineered for illumination and fan management in refrigerators, freezers, and congealers. Its robust design ensures durability and consistent performance across diverse environments, including microwave ovens and air-conditioning units.

Technical Specifications

Primary Applications

- Refrigerators
- Freezers
- Congealers
- Microwave ovens
- Disinfection cabinets
- Air-conditioners

Model ID	8688
Mounting Configuration	Metal bracket mounted

Compliance and Quality

Quality Standards	Certified Design, Registered Trademark
