

Refrigerator Evaporator Plate

365x215x1.2mm

This refrigerator evaporator plate is 365mm x 215mm x 1.2mm. It absorbs heat from inside the refrigerator using a network of channels for refrigerant flow.

Product Overview

High-Efficiency Evaporator Plate

The JN-E096 refrigerator evaporator plate is a critical component designed for optimal thermal exchange within refrigeration systems. Measuring 365mm by 215mm with a 1.2mm thickness, this plate features an integrated network of channels to maximize surface area and ensure efficient heat absorption. It comes equipped with a capillary tube for seamless refrigerant flow and includes pre-drilled mounting holes for straightforward installation.

Physical Dimensions

Length	365 mm
Width	215 mm
Thickness	1.2 mm

Technical Details

Model Number	JN-E096
Material	Thermally conductive aluminum
Key Features	Integrated Capillary Tube, Optimized Heat Transfer, Easy Installation, Mounting Holes Included
