

Refrigerator Hermetic Compressor

This refrigerator compressor is designed for optimal cooling performance. It operates on 220V-240V and 50/60Hz power supply and features robust construction for durability.

Product Overview

High-Efficiency Hermetic Cooling Solution

This hermetic refrigerator compressor is engineered for high-performance cooling in domestic and commercial refrigeration units. Designed with a focus on energy efficiency and low-noise operation, it provides a versatile solution for various appliance setups. Its robust construction ensures long-lasting durability, supporting stable operation across a wide speed range.

Performance Metrics

Operating Parameters

Refrigerant	Disp (cc)	Capacity (W)	COP (W/W)
R600a	6.0-13.0	40-300	1.60-2.05
R134a	-	70-300	1.60-1.70
R290	-	110-480	1.60-1.75

Technical Specifications

Unit Weight	6.8 kg
Electrical Requirements	220V-240V, 50/60Hz

Application & Features

Product Highlights

- Low noise operation
- Compact footprint
- Lightweight design
- Wide speed range efficiency

Suitable Applications

Refrigerator • Freezer
