Product Overview

High-Performance Abrasive Cutting

This reinforced abrasive cut-off wheel is engineered for precision and durability in demanding metalworking environments. Featuring a flat profile, it ensures maximum contact with the workpiece for faster cutting speeds and reduced vibration. Designed for professional use, this disc provides consistent performance on both steel and stainless steel applications.

Dimensions & Specifications

Dimensions

115 mm
Diameter

1.6 mm
Thickness

22 mm
Bore Diameter

Grit Specification

A46R-BF

Performance & Safety

Maximum Performance

13300 RPM
Max RPM

80 m/s
Max Speed

Safety Standards

EN 12413

Application Details

Compatible Materials

- Steel
- Stainless Steel
- Ferrous Metals
- Non-ferrous Metals

Wheel Type

Type 41 • Flat Profile
