

Reinforced Back Hand Saw for Woodworking

This back saw features a thin blade and a reinforced back edge for rigidity. It is designed for precise and controlled cuts in fine woodworking and joinery.

Product Overview

Precision Woodworking Tool

This reinforced back hand saw is designed for high-precision tasks such as cutting dovetails and tenons. Featuring a reinforced back edge for added rigidity, it prevents blade buckling to ensure accurate, controlled cuts. The ergonomic handle design promotes comfort and consistent pressure, while the thin blade minimizes material waste for clean, professional results.

Technical Specifications

Model Number	DT1905
Saw Type	Back Saw

Design Features

Key Features	Reinforced Back, Ergonomic Handle, Thin Blade, Narrow Kerf
--------------	--

Applications

Best For

- Dovetail joints
- Tenon cutting
- Fine woodworking
- Joinery
