

Reinforced Back Hand Saw

This hand saw features a thin blade and a reinforced back edge for increased rigidity. It is designed for precise and controlled cuts, making it suitable for fine woodworking and joinery tasks.

Product Overview

Precision Reinforced Back Hand Saw

The Reinforced Back Hand Saw is a specialized tool engineered for high-precision woodworking and joinery tasks. Featuring a thin, stiffened blade with a reinforced back edge, this saw ensures exceptional rigidity and control during every cut. Designed for professionals, it delivers clean, accurate results across various wood types.

Technical Specifications

Best For

- Fine Woodworking
- Joinery
- Precision Cutting

Model Number	DT1902
Blade Characteristics	Reinforced Back, Thin Blade, Fine Teeth

Design & Ergonomics

Handle Ergonomics	Yes
