

Reinforced Blade Grass Shear

This grass shear is designed with reinforced blades for durability and extended use. Its ergonomic handles provide a comfortable grip, reducing fatigue during prolonged trimming.

Product Overview

Professional Performance and Durability

These reinforced grass shears are engineered for precision trimming in demanding gardening environments. Featuring high-quality manganese steel blades subjected to high-temperature quenching, these shears deliver exceptional cutting edge retention and long-term durability. The ergonomic design includes a 20-degree folding angle to ensure comfortable operation and reduced fatigue during extended professional use.

Technical Specifications

Blade Material	65# Manganese Steel
Handle Material	TPR (Thermoplastic Rubber)
Blade Angle	20 degree
Heat Treatment	High temperature quenching
