

# Reinforced Resin Grinding Wheel for Metal

Abrasive grinding wheel designed for cutting and grinding metal. It features a reinforced resin bond for enhanced durability and safety during use with angle grinders.

## Product Overview

### High-Performance Industrial Grinding

This reinforced resin grinding wheel is engineered for demanding metalworking applications, offering a balance of durability and aggressive cutting performance. Designed specifically for use with angle grinders, the resin bond construction ensures structural integrity and safety during high-speed operation. It is an essential tool for professional industrial environments requiring reliable abrasive solutions.

## Technical Specifications

### Max Operating Speed

**80 m/s**

Max Speed

### Abrasive Specification

27A, WA24R

## Application & Usage

### Intended Application

- Metal cutting
- Metal grinding
- Industrial applications
- Professional use

### Tool Compatibility

Angle Grinders

## Safety & Compliance

### Construction

Reinforced Resin Bond
