

Remote Controlled Cleaning Robot

This cleaning robot features remote control technology, allowing operation from up to 15 meters. The robot's components are constructed with specific materials and colors.

Overview

Advanced Remote Controlled Cleaning

This cleaning robot introduces industry-first remote control technology, allowing for precise operation from distances of up to 15 meters. Designed for efficiency and ease of use, the unit features a durable construction with a sleek, professional finish. It is an ideal solution for automated maintenance tasks requiring remote navigation and obstacle management.

Technical Specifications

Remote Control Range	15 meters
----------------------	-----------

Design & Materials

Conducting Resin Color	PT Black C
Top/Bottom Shell & Battery Cover Color	PT Black C
Printing Colors	PT 877C
