

Remote Controlled LED Emergency Bulb

This LED emergency bulb has an independent driver ensuring stable performance and a longer lifespan. The larger battery capacity provides extended emergency time.

Product Overview

Intelligent Emergency Lighting

This remote-controlled LED emergency bulb is engineered for reliability and performance in critical situations. Featuring an independent and intelligent driver, it ensures stable operation and an extended lifespan compared to standard bulbs. With a high-capacity battery, it provides longer emergency illumination and supports quick charging capabilities to ensure readiness when power outages occur.

Technical Specifications

Key Performance Features

- Secure and stable performance
- Extended emergency lighting duration
- High-capacity battery
- Quick charge functionality

Driver Technology

Independent and intelligent driver
