

Remote Controlled Misting Fan

This misting fan provides a versatile cooling solution by combining a fan and a humidifier. The fan features a remote control for convenient operation, allowing users to switch between humidifying and fan modes.

Product Overview

Versatile Cooling Solution

The 702 mist fan is a dual-function cooling device that seamlessly combines the utility of a traditional fan with an integrated humidifier. Designed for efficient air circulation and moisture control, this unit features a distinct spherical fan head and a sturdy frame suitable for various indoor settings. With the included remote control, users can easily toggle between humidifying and fan modes for customized comfort.
