

Remote Controlled Parking Barrier

This automatic parking barrier is a remote-controlled parking lock designed to protect parking spaces. It features durable steel construction, remote operation, and a rechargeable battery for long-lasting performance.

Product Overview

Smart Parking Protection

This automatic remote-controlled parking barrier is designed to protect your parking space from unauthorized use. Featuring a durable steel construction with a high-visibility yellow finish, it is built to withstand vehicle impact and outdoor environmental conditions. The system includes an integrated alarm to deter tampering, making it an ideal security solution for private, commercial, and public parking areas.
