

Remote Controlled Smart Plug

This smart plug allows for remote control and energy monitoring of connected devices. It features a standard AC power outlet and wireless connectivity for integration with smart home systems.

Product Overview

Smart Remote Power Management

This compact smart plug is designed to provide seamless remote control and energy monitoring for your connected appliances. With support for up to 15A of power, it ensures reliable operation for a wide range of electronics. Users can easily manage their power usage through smartphone app integration, allowing for convenient scheduling, energy tracking, and manual overrides.
