

Remote Controlled Wall Fan

This wall fan features three blades and a wire safety cage. It comes with a remote control for convenient operation.

Product Overview

Professional Wall-Mounted Cooling Solution

The FTW-40 remote-controlled wall fan is designed to provide efficient and customizable airflow for commercial and indoor environments. Featuring a powerful pure copper motor and three distinct wind modes, it delivers reliable performance with simulated natural and sleeping wind options. Its versatile design includes horizontal oscillation, adjustable tilt head, and a convenient timer for optimized climate control.
