Product Overview

High-Performance Main Bearing Set

This precision-engineered main bearing set is designed specifically for R14 engines to ensure optimal crankshaft support and smooth operation. Engineered for durability, the bearings provide superior wear resistance and reduced friction, helping to extend the lifespan of the engine. Suitable for both standard and modified engine configurations, they offer reliable performance under high-load conditions.

Technical Specifications

Size Class

STD

Engine Application

RENAULT R14

Part Markings

SYM 55607, 9-19, HK

Set Size

3
