

Replacement Double Edge Blades

These are replacement double edge blades for cutting tools. Each blade has a mounting hole for secure attachment.

Product Overview

High-Performance Replacement Blades

These double-edge replacement blades are engineered for efficient grass cutting in lawn mower applications. Constructed from durable 65Mn steel with a hardness rating of 50HRC, they offer reliable performance and wear resistance. Designed for versatility, these blades can be secured with standard screws and screwcaps, making them an essential component for garden maintenance equipment.

Technical Specifications

Material	65Mn Steel
Hardness	50 HRC
Thickness	2 mm
Primary Application	Lawn Mower, Garden Maintenance, Grass Cutting
