Product Overview

Professional Reptile Lighting Solution

This metal halide lamp is engineered specifically for reptile enclosures, providing essential UVA and UVB light to support natural vitamin D3 synthesis and calcium absorption. Designed to mimic natural sunlight, it delivers a focused beam of heat and light that promotes healthy activity levels in lizards, snakes, and turtles. With a durable construction and high color rendering index, it ensures both longevity and accurate color perception for your habitat.

Technical Specifications

Key Light Benefits

- UVB Emission for Vitamin D3 Synthesis
- UVA Emission for Activity
- High Color Rendering Index (CRI)
- Focused Heat and Light Beam

Available Sizes	PAR20, PAR30, PAR38
Socket Compatibility	E26/E27
