

Residential Air Conditioning Unit

This compact air conditioning unit is designed for residential or small commercial use. It features a louvered front panel for efficient air intake and side-mounted control knobs.

Product Overview

Efficient Residential Cooling Solution

This compact air conditioning unit is engineered for residential and small commercial environments, offering a reliable solution for temperature control. It features a durable, weather-resistant enclosure designed to withstand outdoor elements while maintaining peak performance. The unit's louvered front panel ensures efficient air intake, optimizing the cooling process for consistent indoor comfort.

Design & Construction

Key Components

- Side-mounted control knobs
- Integrated refrigerant connections
- Compact footprint
- Weather-resistant finish

Enclosure Material	Durable, weather-resistant housing
Air Intake System	Louvered front panel for efficient airflow

Application

Recommended Application

Residential • Small Commercial
