

Residential Electric Tankless Water Heater

This high-efficiency water heater is designed for residential use. It features intelligent temperature control, ensuring consistent and comfortable hot water delivery.

Product Overview

High-Efficiency Residential Solution

The ZH3 series is a high-efficiency electric tankless water heater engineered for modern residential applications. It incorporates intelligent temperature control technology to provide consistent, comfortable water flow while maintaining a compact, space-saving profile. Designed with longevity in mind, the unit features a durable construction and an intuitive digital interface for seamless operation and real-time monitoring.

Technical Features

Safety Protection	Overheating Protection, Leak Prevention
Interface	Digital display

Performance

Design	Compact • Energy-Efficient
Heating Type	Electric Tankless
