

Residential Electric Water Heater with Digital Display

This water heater is designed for residential use. It features a digital display and stainless steel finish.

Product Overview

Efficiency Meets Performance

This residential electric water heater is engineered for high performance and energy-conscious households. It features a modern digital display for precise temperature monitoring, ensuring both safety and convenience. The unit is designed with a durable stainless steel finish, making it a reliable and aesthetically pleasing addition to modern residential plumbing systems.

Technical Specifications

Hot Water Production Rate

12 L/min

Hot Water Production

Gas Consumption	24 MJ/h
Energy Efficiency Grade	3
Applicable Standard	GB20624-2014

Key Features

Build Quality

- Stainless steel exterior finish
- Digital temperature interface
- Standard plumbing connection compatibility

Key Highlights	Safety-Focused, Environmentally Friendly, Quick Heating, Energy Saving, Digital Display
