Product Overview

High-Efficiency Residential Heating

This residential gas boiler is engineered for reliable and efficient home heating performance. Featuring a compact design, it integrates a digital display for precise temperature monitoring and intuitive control knobs for easy operation. Built with safety mechanisms for secure daily use, it offers consistent heating suitable for various residential requirements.

Technical Specifications

Model Number	TJ1401
Compatible Gas Types	LPG, NG
Rated Voltage	220 V~50 Hz
Working Pressure	0.25 Mpa

Performance Metrics

Power Capacity Options

- 14
- 18
- 20
- 24
- 28
- 32

Dimensions

Dimensions by Capacity

Capacity (kW)	Dimensions (mm)
14/18/20/24	740*400*305
28/32	740*400*320
