

Residential Kitchen Ventilation Hood

This range hood is designed for residential kitchen ventilation. It features multi-layered filtration, integrated LED lighting, and variable speed fan control to remove smoke, steam, and cooking fumes.

Product Overview

Professional Residential Ventilation

This high-performance residential kitchen ventilation hood is engineered to maintain a clean and odor-free cooking environment. Featuring a robust multi-layered filtration system and efficient air extraction capabilities, it effectively removes smoke, steam, and airborne grease. Designed with both convenience and longevity in mind, it includes integrated LED surface lighting and easy-to-clean dishwasher-safe components.

Technical Specifications

Ventilation Type	Residential, Range Hood
Integrated Lighting	LED Surface Illumination
Fan Control	Variable Speed Control

Maintenance

Maintenance

Dishwasher-safe filters • Easy installation

Filtration System	Multi-layered grease and odor capture
