

Residential Solar Water Heater

This high-efficiency solar water heater is designed for residential use. It features evacuated tube collectors for maximum solar energy absorption and a well-insulated storage tank to minimize heat loss.

Product Overview

Sustainable Residential Hot Water

This high-efficiency residential solar water heater utilizes advanced evacuated tube technology to maximize solar energy absorption. Engineered with a heavily insulated storage tank, it effectively minimizes heat loss to ensure a reliable supply of hot water. Its robust construction provides a durable, cost-effective, and environmentally friendly solution for modern household energy needs.

Technical Specifications

Application

Residential

Collector Technology

Evacuated tube collector

Key Features

High-Efficiency, Heat Loss Mitigation, Sustainable Energy, Durable Construction
