

Residential Stainless Steel Range Hood

This stainless steel range hood is designed for residential use. It features a chimney-style design with a wide capture area and integrated lighting to remove smoke, grease, and odors from the cooking area.

Product Overview

Professional Residential Ventilation

This stainless steel chimney-style range hood provides efficient air purification for modern residential kitchens. Designed to capture smoke, grease, and cooking odors, it ensures a clean and comfortable environment during meal preparation. Its durable stainless steel construction offers both long-term longevity and simplified maintenance for the end user.

Key Features

Material	Stainless Steel
Design Style	Chimney-style
Application	Residential, Kitchen Ventilation

Functional Capabilities

Core Functions

- Smoke extraction
- Grease removal
- Odor neutralization
- Integrated illumination
