

Residential Wall-Mounted Air Conditioner

This wall-mounted air conditioner is designed for residential use. It provides both cooling and heating, along with air filtration for better air quality.

Overview

Comfort and Efficiency Combined

This residential wall-mounted air conditioner is designed to provide optimal climate control with advanced features for home environments. It incorporates photosensitive sensing technology and a fully closed air outlet design to enhance both performance and aesthetics. With capabilities for turbo heating and cooling, as well as an auto-cleaning evaporator, this unit ensures a comfortable and healthy living space with minimal maintenance.

Performance Features

Noise Level

Ultra-low noise

Core Technologies

Photosensitive Sensing, Auto-Cleaning Evaporator, Turbo Heating/Cooling

Design

Air Outlet Design

Fully closed design

Installation Type

Wall-mounted
