

Residential Water Pressure Booster Pump

This water pump is designed for efficient water transfer and pressure boosting in residential and light commercial applications. Featuring durable construction, this pump is suitable for supplying water to homes, gardens, and small irrigation systems.

Overview

High-Efficiency Pressure Booster

The PS-130B is a specialized water pressure booster pump engineered for reliable water transfer in residential and light commercial environments. It features an integrated automatic pressure switch that maintains consistent flow, making it ideal for home water supply, garden watering, and small-scale irrigation tasks. Designed for durability and quiet operation, this pump ensures a steady, low-maintenance performance for professional and domestic installations.

Performance

Operating Metrics

0.1 kgf/cm²

Starting Pressure

1.8 kgf/cm²

Cut-off Pressure

Features

Core Features

- Automatic operation via integrated pressure switch
- Durable construction for longevity
- Quiet operation technology
- Minimal maintenance requirements

Applications

Suitable Applications

Residential Water Supply, Light Commercial Use, Garden Irrigation, Pressure Boosting
