

Residential Water Pressure Booster Pump

This water pressure booster pump is designed for residential and light commercial use. It features a two-pole induction motor, insulation class B, and IP44 protection.

Product Overview

Reliable Residential Water Boosting

This residential water pressure booster pump is designed for efficiency and reliability in domestic settings. Its compact construction makes it suitable for various applications, including garden irrigation, water distribution, and drawing water from tanks. Engineered for ease of use, the unit includes a built-in flap-check valve and features automatic operation based on water demand.

Technical Specifications

Fluid Compatibility	Clean water, Non-abrasive, Non-aggressive
Installation	Must be installed in an enclosed environment or sheltered from inclement weather.

Features & Benefits

Key Features

- Compact and reliable design
- Includes flap-check valve
- Automatic start/stop operation
- Thermal overload protection
- Quiet operation

Typical Applications

Garden Irrigation • Domestic Water Distribution • Tank Water Extraction • Well Water Boosting
