

Residential Water Pressure Booster Pump

This water pressure booster pump automatically increases water pressure for residential and light commercial use. The pump's compact design and durable construction provide reliable performance and efficient water delivery to showers, faucets, and other fixtures.

Product Overview

PLX Series Pressure Booster Pump

The PLX series is a versatile automatic water pressure booster pump designed for residential and light commercial environments. It ensures consistent water flow for showers, faucets, and other fixtures, even when multiple outlets are in use simultaneously. Built for reliability, this system is ideal for clean water applications in homes, hotels, and small industrial setups.
