

Residential Water Pressure Booster Pump

This water pressure booster pump is compact and efficient, designed for residential and light commercial use. It features a robust motor, a pressure tank, and automatic operation to maintain consistent water pressure based on demand.

Product Overview

Compact Pressure Boosting Solution

The AU SERIES is a compact and efficient water pressure booster pump designed for residential and light commercial applications. It features a robust motor and an integrated pressure tank to maintain consistent water pressure based on real-time demand. Engineered for reliability and ease of installation, this pump is an ideal solution for homes, irrigation systems, and various applications requiring stable water pressure.

Performance

Key Operating Features

- Automatic operation based on water demand
- Consistent pressure maintenance
- Compact design
- Easy installation

Ideal Applications

Residential, Light Commercial, Home Water Systems, Irrigation

Technical Details

Build Quality

Robust Motor • Integrated Pressure Tank
