

# Residential Water Pressure Booster Pump

This water pressure booster pump automatically increases water pressure in residential and light commercial settings. Its compact design includes an integrated pressure switch and gauge for straightforward setup and monitoring.

## Overview

### Residential Water Pressure Booster

This water pressure booster pump is engineered to automatically enhance water pressure for residential and light commercial environments. Its compact, integrated design includes a built-in pressure switch and gauge, ensuring straightforward installation and continuous performance monitoring. Constructed with durable materials, it provides a reliable solution for improving water flow to showers, faucets, and various household appliances.

## Performance Metrics

### Power Rating

**125 W**

Power

### Maximum Capacity

**38 L/min**

Max Capacity

### Maximum Head

**33 m**

Max Head

## Technical Details

### Key Features

- Integrated pressure switch
- Integrated pressure gauge
- Compact design
- Automatic operation

### Model Number

GP126

### Suitable Applications

Residential, Light Commercial, Shower Boosting, Faucet Boosting
