

# Residual Current Circuit Breaker

This residual current circuit breaker is designed for electrical safety. It has a rated operational voltage of 240V and 415V at 50Hz, conforms to IEC 61008-1 standards, and features an In of 40A and Icn of 0.03A with a tripping time of 0.1s.

## Overview

### Reliable Electrical Protection

The JVL16-63 Residual Current Circuit Breaker (RCCB) is engineered to provide essential electrical safety in commercial and industrial environments. Designed to detect leakage currents, this device ensures rapid disconnection to prevent hazardous conditions. It adheres strictly to international safety standards, offering consistent performance for critical electrical circuits.

## Technical Specifications

Rated Operational Voltage	240V / 415V
Rated Current (In)	40 A
Rated Residual Operating Current (Icn)	0.03 A
Tripping Time	0.1 s
Frequency	50 Hz

## Standards & Compliance

Standards	IEC 61008-1
