

# Residual Current Circuit Breaker RCCB 40A

This residual current circuit breaker (RCCB) is designed for electrical safety, protecting against electric shock and fire hazards from earth leakage currents. It is rated for 40A with 30mA sensitivity and is suitable for 230V and 240/415V systems.

## Product Overview

### Safety and Protection

This Residual Current Circuit Breaker (RCCB) is engineered to provide essential electrical safety by detecting earth leakage currents. It effectively mitigates the risk of electric shock and fire hazards in residential and commercial electrical systems. Designed for reliability and compliance, this unit ensures consistent protection for various circuit configurations.

## Technical Specifications

### Rated Current

**40 A**

Rated Current

### Voltage Ratings

- 230V
- 240/415V

### Sensitivity

30 mA

## Compliance and Standards

### Standards Compliance

IEC

## Configuration

### Pole Configurations

2-Pole • 4-Pole
