

Residual Current Circuit Breaker with Over-current Protection

This residual current circuit breaker with overcurrent protection (RCBO) is designed for electrical safety in residential and commercial applications. It is rated at 230V, 16A, with a residual current sensitivity of 0.01A and a short circuit breaking capacity of 10000A.

Product Overview

Professional Electrical Protection

This Residual Current Circuit Breaker with Overcurrent Protection (RCBO) provides comprehensive electrical safety for both residential and commercial installations. It combines overcurrent protection with residual current detection to effectively prevent electrical hazards. The unit is designed for reliability, featuring a built-in test button for easy functional verification and high-performance breaking capacity.
