

# Residual Current Circuit Breaker with Over-current Protection

This residual current circuit breaker provides overcurrent protection. It features a test month indicator and a leakage current sensitivity of 30mA at 0.1s.

## Product Overview

### Integrated Protection Technology

This Residual Current Circuit Breaker with Overcurrent Protection (RCBO) provides a comprehensive safety solution by combining overload, short-circuit, and earth leakage current protection in a single unit. Engineered for versatility, it is suitable for diverse electrical applications requiring high-reliability current monitoring and rapid trip response. Available with both electronic and magnetic trip units, this device ensures safety across a wide range of sensitivity levels to meet specific operational requirements.

## Technical Specifications

Leakage Sensitivity Range	10mA to 300mA
Trip Response Time	0.1 s
Available Trip Units	Electronic, Magnetic

## Compliance and Standards

Regulatory Approvals  
CE • CCC
