

Resin Bonded Abrasive Cutting Wheel 355 x 3.0 x 25.4mm

This is an abrasive cutting wheel. It has dimensions of 355 x 3.0 x 25.4mm, a maximum operating speed of 80m/s, and a maximum rotation speed of 4400 RPM.

Product Overview

Professional Resin-Bonded Cutting Wheel

This high-performance resin-bonded abrasive cutting wheel is engineered for precision metal cutting applications. Designed with robust construction to withstand demanding industrial environments, it offers consistent performance and reliability. With a standard 355mm diameter, this wheel is an essential consumable for heavy-duty metal fabrication tasks.

Technical Specifications

Classification

A 30 R B2-F

Dimensions	355 x 3.0 x 25.4 mm
Imperial Dimensions	14" x 1/8" x 1"
Max Operating Speed	80 m/s
Max Rotation Speed	4400 RPM
Application	Metal Cutting
Reference Number	A0083
